10/1/2025

CURRICULUM VITAE

NAME

Fadi I. Musfee, MD, MPH, PhD

PRESENT TITLE(S)

Assistant Professor

Border Health Research Center

Department of Epidemiology, UTHealth School of Public Health – Brownsville

campus

University of Texas Health Science Center at Houston

Faculty member

Vascular Cognitive Impairment and Brain Health The Institute for Stroke and Cerebrovascular Diseases

UTHealth McGovern School of Medicine

University of Texas Health Science Center at Houston

ADDRESS

Brownsville office (main):

N.100E

780 Ringgold Road, Brownsville, TX 78520

Houston office:

W.1113S

UTHealth Professional Building

6410 Fannin Street, Houston, TX, 77030

UNDERGRADUATE EDUCATION

Baghdad College

September 1996 – July 2002 Degree: Bachelor of Science

GRADUATE EDUCATION

University of Baghdad – College of Medicine

September 2002 – July 2008

Degree: Bachelor of Medicine and Surgery (MBChB)

Education commission for foreign medical graduates' certificate (ECFMG)

February 2013 Degree: MD

University of Texas Health Science Center at Houston

School of Public Health

August 2014 – December 2016

Degree: Master of Public Health (MPH)

University of Texas Health Science Center at Houston

School of Public Health January 2017 – May 2021

Degree: Doctorate of Philosophy, Epidemiology with bioinformatics and

genomics track

Dissertation: "X-Linked Genetic Associations in Sporadic Thoracic Aortic

Dissection"

POSTGRADUATE TRAINING

Orthopedic Surgery and Acute Trauma Resident

Baghdad – Iraq 2009-2012

Research Fellow

Baylor College of Medicine – Department of Vascular Surgery 2015-2017

Graduate Research Assistant

UTHealth School of Public Health – Center for Clinical Trial University of Texas Health Science Center at Houston 2015-2016

Graduate Research Assistant

UTHealth School of Public Health – Epidemiology Department University of Texas Health Science Center at Houston 2017-2021

Post-doctoral Fellow

University of Arkansas for Medical Sciences – Department of Epidemiology Fay Boozman School of Public Health 2021 – 2023

PROFESSIONAL ORGANIZATIONS

Epidemic Intelligence Society (SEIS)

University of Texas Health Science Center at Houston.

American Medical Association.

American Society of Human Genetics.

American Heart Association.

HONORS AND AWARDS

Outstanding New Student Scholarship

2017

University of Texas Health Science Center at Houston, School of Public Health

Travel award

2019

University of Texas Health Science Center at Houston, School of Public Health

Travel award

2022

Birth Defects Research and Prevention meeting in Vancouver, Canada

Wilson Presentation Award finalist

2022

Birth Defects Research and Prevention meeting in Vancouver, Canada

Student Spotlight – School of Public Health Newsletter

2019

University of Texas Health Science Center at Houston, School of Public Health

Delta Omega society of Public Health

2021

University of Texas Health Science Center at Houston, School of Public Health

Early-stage investigator participant in the NRMN SETH

2022

NIH Strategic Empowerment Tailored for Health Equity Investigators (NRMN SETH) Research Study

PAST AND CURRENT TEACHING ACTIVITIES

Intermediate Epidemiology (Epidemiology III)

Course instructor

January 2025 – current

Course, design, discussion facilitation, instruction

The University of Texas School of Public Health – Brownsville campus and live synchronous online to other campuses

Independent Study – Dissertation hours

Course instructor

Summer 2025

Dissertation guidance and supervision

The University of Texas School of Public Health – Brownsville campus

Epidemiological Approaches in Neurological and Mental Health Disorders

Course instructor

Summer 2026

New course designed for students interested in neuroepidemiology and brain health

Course design, discussion facilitation, instruction

The University of Texas School of Public Health – Brownsville campus and live synchronous online to other campuses

Brain Health Research Group Seminar Series

Seminar facilitator and content creator with the collaboration from the institute for stroke and cerebrovascular diseases

March 2025 – current

Once a month – open to faculty and trainee in neurology and neuroepidemiology.

Topics cover recent publications and major areas of brain health related to vascular brain health, genomics brain health, artificial intelligence and brain health

Online meeting – 3rd Thursday of every month

Brain Health Research Group Journal Club

Journal club facilitator with the collaboration from the institute for stroke and cerebrovascular diseases

August 2025 – current

Twice a month – open to faculty and trainee in neurology and neuroepidemiology.

Topics cover recent publications from high tier journals such as Nature, Science, and the Lancet

Online meeting – 2nd and 4th Thursday of every month

CURRENT AND PAST STUDENTS AND MENTEE

Ruth Yanes Bengoa, MD

Degree: Master of Public Health, Epidemiology Department

Role: Practicum Preceptor supervisor

Practicum title: Training Community Health Workers in Stroke Generalities and

Rehabilitation Post-Stroke

Finalist and 500\$ award at the Practice Day 2025 Pitch competition at the University of Texas School of Public Health

Cesar Gutierrez, MD

Degree: Master of Science, Epidemiology Department

Role: Thesis supervisor

Thesis title: Association of Hemoglobin A1c with Diastolic Dysfunction in a Non-Diabetic Mexican American Population: A Cross-Sectional Study

Degree conferred 2025

Hari K. R. Indupuru, MD

Degree: Doctor of Philosophy, Epidemiology School of Public Health – Houston Campus

Role: committee member

2025 – current

Riya Ghosal, MPH

Degree: Doctor of Philosophy, Epidemiology School of Public Health – Austin Campus

Role: Supervisor 2025 – current

Kayleigh Armendariz

Degree: Master of Public Health, Epidemiology School of Public Health – Houston campus

Role: Academic advisor

2025 - current

Micah Okwah

Degree: Master of Public Health, Epidemiology School of Public Health – Houston Campus

Role: Academic Advisor

2025 - current

RESEARCH SUPPORT

ACTIVE RESEARCH SUPPORT

Agency: National Center for Advancing Translational Sciences (NCATS)

Title: A new at-home telerehabilitation care service delivery model for stroke

survivors in the Rio Grande Valley

Type: Pilot Role: PI

Dates of award: July/2024 to June/2025

Description: The objective of this study was to deliver telerehabilitation services for stroke survivors who have no insurance or limited access to rehabilitation services through a software and with the assistance of community health workers in the Rio Grande Valley, Texas.

Agency: UTHealth Institute on Aging

Title: The Early Structural and Molecular Changes in The Brain Cognitive Aging Process Among Hispanic/Latino Individuals from The Cameron County Hispanic Cohort

Role: PI

Dates of award: January/2025-January/2026

Description: This pilot is to examine cerebral small vessel disease changes in a population of the Rio Grande Valley and collect biological specimens for future genomic analyses.

Agency: NIH - common fund

Type: R01

Title: The Vanderbilt-coordinated human virome characterization center

(V2C2)

Role: Co-I (PI: Susan Fisher-Hoch)
Dates of award: July/2024-June/2029

Description: The objective of this project is to identify viral genome integrated in the human genome sequence and to characterize the impact of such viral insertions on the human health and disease in diverse populations.

Agency: UTHealth Institute on Aging

Type: Pilot

Title: The Neurobiological Toll of Long-Term Caregiving: Linking Social

Adversity to Pathological Brain Aging.

Role: Co-I (PI: Chelsea Liu)

Dates of award: September/2025-September/2026

Description: This project will look into brain aging through examining MRI scans and brain aging changes among those who deliver care to family members with dementia.

PENDING RESEARCH SUPPORT

Agency: NIH NIA Type: R03 (pending)

Title: Glymphatic System Functionality as a Neuroimaging marker for

Cognitive Reserve and Future Cognitive Impairment

Role: PI

Dates of award: pending (04/01/2025 – 03/31/2027)

Description: The objective of this project is to study glymphatic functionality through measuring water movement between interstitial brain tissue and medullary vein and examine the relationship between this water movement and the development of cognitive reserve and future cognitive impairment.

Agency: Texas Alzheimer's Research and Care Consortium (TARCC)

Type: Investigator initiated (pending)

Title: Uncovering Proteomic Biomarkers of Cognitive Impairment in Mexican

Americans Role: Pl

Dates of award: pending (Dec/2025-Dec/2027)

Description: The objective of this project is to sequence 200 participants from the Cameron County Hispanic Cohort who showed consistent decline in their cognitive function over 5 to 10 years of follow-up using the ALAMAR proteomic panel. The goal is look into associations between known markers for dementia and cognitive scores in this population.

Agency: NIH NIA Type: R01 Chelsea

Title: Cognitive Decline and Brain Aging in a High-Risk Population in South

Texas: Role of Cardiometabolic Risk Factors.

Role: Co-I (PI: Chelsea Liu)

Dates of award: pending (04/01/2026 - 03/31/2031)

Description: The objective of this proposal is to look into the duration of impact of cardiometabolic risk factors on the development of cognitive impairment and dementia using MRI aging markers.

Agency: Texas Alzheimer's Research and Care Consortium (TARCC)

Type: Investigator initiated (pending)

Title: Next-Gen AI Cognitive Decline Risk Scores: Integrating Social, Genetic, Medical, and Brain Imaging Information to Improve Prediction Across Diverse Populations.

Type: investigator initiated

Role: Co-I (PI: Augusto De Moraes)

Dates of award: pending (Dec/2025-Dec/2027)

Description: This project will create a clinically meaningful and Al generated risk score for cognitive impairment in diverse populations.

Agency: The Brightfocus foundation

Type: Pilot

Title: Neurodegeneration in a High-Risk Community in Texas: Role of Social

Adversity and Social Support Role: Co-I (PI: Chelsea Liu)

Dates of award:

Description: This project will look into the impact of social factors on accelerating brain aging in south Texas where communities suffer from high social burdens and limited support.

Agency: The Brightfocus foundation

Type: Pilot

Title: AI-Powered Early Risk Prediction for Alzheimer's: Integrating Behaviors,

Social Factors, Genes, and Brain Images Across Diverse Populations

Role: MPI (PI: Augusto De Moraes)

Dates of award: pending July/2026 - June/2029.

Description: This proposal aims to generate a comprehensive prediction approach that integrates social, clinical, and genetics drivers using an Al generated approach based on data from diverse populations.
